

BELLIN
THE POWER OF EXPERIENCE
Since 1950's

Heavy abrasion (>12% dry solids) and high viscosity (> 25.000 cPs)

Medium abrasion (5-12% dry solids) and medium viscosity (5.000 - 25.000 cPs)

Light abras. (1-4%) and low viscos. (1.000-5.000 cPs)

No abrasion and viscosity (<1.000 cPs)
